

Exercice n°1 :

$$(-6) + (-2) = -8$$

$$(-5) + (+10) = 5$$

$$(+56) + (-60) = -4$$

$$-60 + 60 = 0$$

$$30 + (-10) = 20$$

$$(+17) + (+6) = 23$$

$$(-3) + (-10) = -13$$

$$(-10) + (+30) = 20$$

$$-6 + (+4) = -2$$

$$12 + (-11) = 1$$

$$(-100) + (-16) = -116$$

$$(-0,6) + (+1) = 0,4$$

$$-15,2 + 10 = -5,2$$

$$-1\,111 + (-9) = -1\,120$$

$$90 + (-40) = 50$$

Exercice n° 2 :

$$A = 42 + 15 + (-42) + 15 + (-5) + (-10)$$

$$A = \underbrace{42 + (-42)}_0 + 15 + 15 + \underbrace{(-5) + (-10)}_{-15}$$

$$A = 0 + 15 + 15 + (-15)$$

$$A = 15 + 0$$

$$A = 15$$

$$B = (+13) + (-12) + (+27) + (-18)$$

$$B = \underbrace{(+13) + (+27)}_{+40} + \underbrace{(-12) + (-18)}_{-30}$$

$$B = (+40) + (-30)$$

$$B = (+10)$$

$$C = (-508) + (+1014) + (-100) + 8 + (-1\,014)$$

$$C = \underbrace{(+1\,014) + (-1\,014)}_0 + \underbrace{(-508) + 8}_{-500} + (-100)$$

$$C = 0 + (-500) + (-100)$$

$$C = -600$$

Exercice n°3 :
